

**Mill Creek**  
Manufacturing Ltd.

We take a team approach to advising clients on the right planning and design ideas to help achieve superior results.

## COMPANY

From our first consultation, when we discuss the design elements, your personal needs and desires and the space, we begin to plan and layout your kitchen. Communication is key as we develop an initial plan as well as an estimate, which allows clients to budget accordingly.

## SERVICES

Building Custom  
Cabinetry That  
Makes Your House a  
Home.

## WHAT WE DO

Plan, Design, and Build the Kitchen of your dreams, incorporating endless choices in materials and styles

### Choosing Materials - Woods, Finishes, Handles, Countertops, Range Hoods, Sinks, Etc.

Knotty alder, cherry, hickory, black walnut and sapele are a few of the many wood species available. Choose from a huge variety of door styles to compliment the perfect finish. Achieve the style you want, whether it is classic, contemporary, or rustic. We provide sleek stainless steel counters or beautiful solid granite countertops hand chosen by you. Custom range hoods, and solid rock or bamboo sinks are some more of the quality products we offer.

### Designing Software That Enables us to provide 3-Dimensional Images

The Kcdw software program allows us to input your room dimensions and design details to generate 3-D drawings. Deciding on the right layout, crown moulding, countertops, or finished end is simpler with a realistic picture of your plan. Visualizing the final result is an invaluable tool in the planning process.

### Professional Installation & Coordination with Your Building Contractor

Working together with your contractors, we coordinate planning to prevent mishaps when the installation date arrives. Our professional installers provide excellent service and will go beyond installing your cabinetry and often cut out sink holes or install a B/I microwaves
